Usability

Having had several years of experience, I've occupied several roles in this industry. From crafting newsletters, static sites, CSS architecture for big portals, RWD audits, performance optimization and UX to even managing small teams. I have a strong work ethic, develop a relationship of trust with my clients & colleges and solve hard problems balancing quality, elegance and time constraints.

Right now I'm focusing on building Single Page Applications using React, Redux and CSSinJS; I'm not married to these technologies but prefer the Component, Composability and Functional approach of React and React-like frameworks (Vue.js, Hyperapp, Preact, Inferno, etc.) Would be glad to work with Elm, PureScript or ClojureScript too.

React Flow Diagram is [Open Source](https://github.com/DrummerHead/react-flow-diagram) code you can review right now — <https://github.com/DrummerHead/react-flow-diagram> to gauge my code quality, code style, UX abilities, documentation skills and git workflow

# Education

---

I have formal training in Graphic Design, Typography Design, Color Theory & Copywriting (*Licenciatura en Diseño Gráfico, ORT University Uruguay 2005–2008*)

But my main source of knowledge is continuous study and self improvement led by insatiable curiosity. I've read books, articles and followed the best people and projects in all things Front-End to keep my skills up to date; a process that will continue indefinitely.
